

Linear

The natural alternative

WOOD

Wood is a unique and living material, therefore the natural characteristics can be clearly seen in this product, a true product of nature.

Solid wood ceiling systems consist of linear wooden panels fixed to an integrated metal suspension system. These wood ceilings enhance the atmosphere of any space, creating a warm and natural environment.

- Offered in linear open, linear closed and grid systems
- Module sizes from 82.5 to 150 mm
- Panel widths from 63.5 to 135 mm
- Over 15 standard wood species, including birch, oak, maple, Oregon pine and more
- Panels can be finished with transparent or coloured varnishes
- Curved or undulating possibilities
- Demountable system
- Acoustical or plain planks
- FR treatment

We also offer solid wood ceiling systems for exterior applications.

- Non-demountable ceiling system
- Varnish on all 4 sides
